

Understanding Alternative Fuels

Claudia Beumer: Membership and Communications Manager, SGMF

With an education in Chemical Engineering and a proven track record in the bunkering industry, Claudia has a wide experience on alternative fuels. From the moment she entered the maritime sector 15 years ago, Claudia started to grow a passion for LNG, its fossil free alternatives and other future fuels.

After exploring all angles of the maritime fuels industry, in Emerson, Wärtsilä Gas Solutions and VT Shipping, Claudia has developed extensive knowledge on the use and bunkering of both conventional and alternative fuels.

Already back in 2014 she contributed to the SGMF workgroup on Quality and Quantity Measurements of LNG and since 01-01-24, Claudia is now part of the SGMF team as Membership and Communications Manager, supporting SGMF's members in their transition towards decarbonisation.

In addition to her activities within SGMF, she also runs her own company (C4 fuel) conducting training and advise on Mass Flow Meters and future fuels bunkering.
